

2005 Annual Report

Dear Fellow Stockholders,

As you know, we have a long history of providing our stockholders with a strong and consistent return on their investment. In 2007, we achieved a total return to our stockholders of 200%.

Our 2007 performance was a result of our strong operating performance, which was supported by our strategic investments in the energy sector. Our operating performance was supported by our strong financial performance, which was supported by our strong balance sheet. Our strong balance sheet was supported by our strong cash flow, which was supported by our strong operating performance.

1. The first part of the document is a list of the names of the members of the committee who were appointed to study the problem of the... **R**

The first part of the paper discusses the importance of the
 \mathbb{R}^n -valued function $f: \mathbb{R}^n \rightarrow \mathbb{R}^n$
 and the $n \times n$ matrix A in the system of
 differential equations $y' = Ay$. The second part
 discusses the $n \times n$ matrix A in the system of
 differential equations $y' = Ay$. The third part
 discusses the $n \times n$ matrix A in the system of
 differential equations $y' = Ay$. The fourth part
 discusses the $n \times n$ matrix A in the system of
 differential equations $y' = Ay$. The fifth part
 discusses the $n \times n$ matrix A in the system of
 differential equations $y' = Ay$. The sixth part
 discusses the $n \times n$ matrix A in the system of
 differential equations $y' = Ay$. The seventh part
 discusses the $n \times n$ matrix A in the system of
 differential equations $y' = Ay$. The eighth part
 discusses the $n \times n$ matrix A in the system of
 differential equations $y' = Ay$. The ninth part
 discusses the $n \times n$ matrix A in the system of
 differential equations $y' = Ay$. The tenth part
 discusses the $n \times n$ matrix A in the system of
 differential equations $y' = Ay$.

Lockheed Martin's Business

Lockheed Martin is a leading provider of defense, space, and technology solutions. The company is a global leader in the design, development, production, and support of a wide range of military and aerospace systems, including aircraft, missiles, satellites, and space exploration systems. Lockheed Martin is also a major contractor for the U.S. Department of Defense and other government agencies.

Lockheed Martin's business is divided into three main segments: Aeronautics, Missiles and Fire Control, and Space. The Aeronautics segment is the largest and includes the design and production of military and commercial aircraft. The Missiles and Fire Control segment includes the design and production of a wide range of missiles and fire control systems. The Space segment includes the design and production of space exploration systems and satellites.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

October 1, 2014

Net Sales by Customer Category

Notes to Five Year Summary

- (a) Includes the effects of items not considered in senior management's assessment of the operating performance of the Corporation's business segments (see the section, "Results of Operations" in Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A)) which, on a combined basis, increased earnings from continuing operations before income taxes by \$173 million, \$113 million after tax (\$0.25 per share).
- (b) Includes the effects of items not considered in senior management's assessment of the operating performance of the Corporation's business segments (see the section, "Results of Operations" in MD&A) which, on a combined basis, decreased earnings from continuing operations before income taxes by \$215 million, \$154 million after tax (\$0.34 per share). Also includes a reduction in income tax expense resulting from the closure of an Internal Revenue Service examination of \$144 million (\$0.32 per share). These items reduced earnings by \$10 million after tax (\$0.02 per share).
- (c) Includes the effects of items not considered in senior management's assessment of the operating performance of the Corporation's business segments (see the section, "Results of Operations" in MD&A) which, on a combined basis, decreased earnings from continuing operations before income taxes by \$153 million, \$102 million after tax (\$0.22 per share).
- (d) Includes the effects of items not considered in senior management's assessment of the operating performance of the Corporation's business segments which, on a combined basis, decreased earnings from continuing operations before income taxes by \$1,112 million, \$632 million after tax (\$1.40 per share). In 2002, the Corporation adopted FAS 142 which prohibits the amortization of goodwill.
- (e) Includes the effects of items not considered in senior management's assessment of the operating performance of the Corporation's business segments which, on a combined basis, decreased earnings from continuing operations before income taxes by \$973 million, \$651 million after tax (\$1.50 per share). Also includes a gain from the disposal of a business and charges for the Corporation's exit from its global telecommunications services business which is included in discontinued operations and which, on a combined basis, increased the net loss by \$1 billion (\$2.38 per share).
- (f) The Corporation defines return on invested capital (ROIC) as net income plus after-tax interest expense divided by average invested capital (stockholders' equity plus debt),
